Objective

- A highly motivated and creative BCA undergraduate seeking an entry-level opportunity in the IT industry to apply and enhance my skills in web development and problem-solving. With a strong foundation in front-end and back-end technologies, I aim to contribute to innovative solutions while continuously learning and growing in a professional environment. I am passionate about technology, open to new challenges, and eager to be part of a team that values creativity, collaboration, and continuous improvement.

Skills

Front-End : HTML, CSS, JavaScript

Back-End : PHP

Framework : Bootstrap

DataBase : MySql

Version Control : Git & Github

IDE : VS Code, SublimeText

Academic Project

Title: *QuickHell – Online Service Booking System*

Project Description:

QuickHell is a web-based service booking platform that allows users to easily book various household services like plumbing, appliance repair, electrician work, and more. The system includes both **User** and **Admin panels**, providing features such as service requests, technician assignment, profile management, and request tracking.

Key Features:

- ✓ **User Registration/Login** with session-based access
- ✓ **Service Request Submission** with auto-filled user info
- ✓ **Admin Panel** to manage requests, technicians, and reports
- ✓ **Track Status** of submitted requests
- ✓ **Change Password & Logout** functionalities
- ✓ **Attractive UI** using Bootstrap and modern layout principles

Technologies Used : HTML, CSS, JavaScript, PHP, MySQL, Bootstrap, XAMPP
